

# Make your Own - Banana Man

Follow these instructions to make your own banana man:

## You will need:

One large yellow ball. This will be your characters body so use a ball as big as you want the character to be.

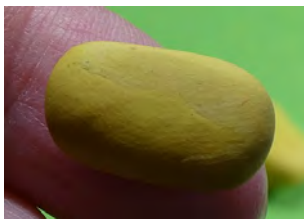

One little yellow ball (for the nose).

Two small white beads. You can use small balls of white plasticine I just find beads easier as they don't squish so quickly.

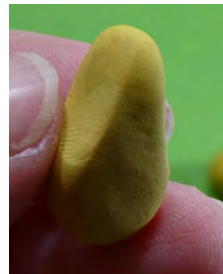

Two little black balls for the eyes.

Four equal sized yellow balls for the hands and feet.

## Feet (make 2):

Take one of the 4 yellow balls and roll it into a rectangle shape.

Squish one end to make it thinner. You should get a triangular shape on one edge.

## Hands (make 2):

Take one of the 4 yellow balls and roll it into a bat shape.

On the wider end, press your finger into the top edge to make a thumb and hand shape.

Squeeze the other end of the shape to make it thinner.

## Body:

Roll the large ball into a sausage and then taper the ends so they are thinner. Push the smaller ends towards one side of the sausage shape.

## Construction:

Push all the pieces together as shown .

Finish off your banana man with a mouth. Use the end of something pointy but not sharp. A dried up pen is perfect.
