

Make your Own - Carrot Man

Follow these instructions to make your own carrot man:

You will need:

One large orange ball. This will be your characters body so use a ball as big as you want the character to be.

One little orange ball (for the nose).

Two little black balls for the eyes.

Two small white beads. You can use small balls of white plasticine I just find beads easier as they don't squish so quickly.

Four equal sized yellow balls for the hands and feet.

Once green ball (for the hair/leaves).

Feet (make 2):

Take one of the 4 orange balls and roll it into a rectangle shape.

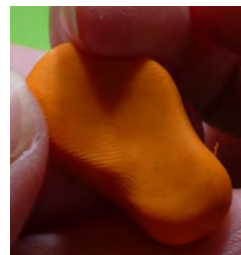

Squish one end to make it thinner. You should get a triangular shape on one edge.

Hands (make 2):

Take one of the 4 orange balls and roll it into a bat shape.

On the wider end, press your finger into the top edge to make a thumb and hand shape.

Squeeze the other end of the shape (not the hand end) to make it thinner. This is where it attaches to the body.

Body:

Roll the large ball into a sausage and then into a carrot shape.

Green leaves:

Roll out a thin green sausage.

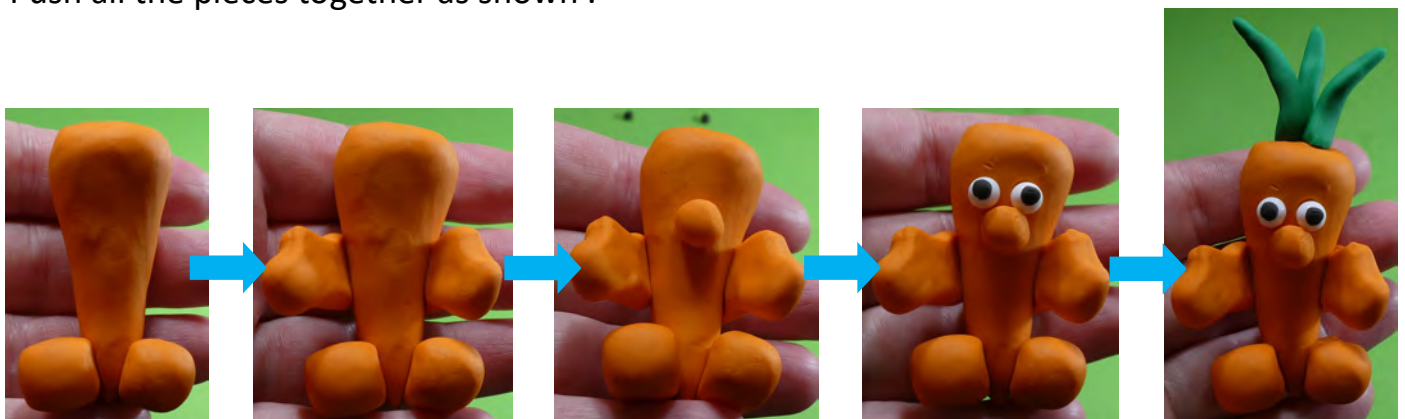

Cut it into 3 sections. These don't need to be even and should be no longer than 1/2 the length of the carrot.

Roll one end of each sausage into a point.

Construction:

Push all the pieces together as shown .

Finish off your carrot man with a mouth. Use the end of something pointy but not sharp. A dried up pen is perfect.
